Experience

Manager IT & Technical Projects

Agile Product Delivery & Systems
2020 – Present

- Direct cross-functional engineering, design and AI teams through end-to-end product lifecycles using Agile methodologies.
- Lead end-to-end ERP implementation projects across departments, covering resource planning, tracking and workflows.
- Integrated CI/CD automation into delivery pipelines, reducing deployment friction by over 40%.
- Plan, build and ship responsive web applications with React, working closely with design and backend teams.
- Deploy and manage applications, pipelines and environments on Microsoft Azure, with a focus on reliability and cost.
- Drive SEO optimization (technical SEO, on-page, meta tags, site speed) to grow organic search traffic.
- Plan and run Meta Ads campaigns across Facebook and Instagram, from creative and targeting to performance tracking.
- Design brand creatives, social media graphics and marketing collateral to keep a consistent visual identity.
- Manage network infrastructure (LAN/WAN, VPN, firewalls) and resolve hardware, software and network issues to keep downtime low.
- Own IT operations, system security protocols and compliance audits.

QA & Systems Automation Lead

Core Engineering
2016 – 2020

- Built automation frameworks and system health checks using Python, Selenium and CI/CD tools.
- Cut bug leakage and manual testing hours with automated UI and API test suites.
- Worked with frontend and backend developers to improve reliability and speed up release cycles.

UI/UX Designer & IT Consultant

Product Design
2014 – 2016

- Translated technical requirements into wireframes and high-fidelity Figma prototypes.
- Ran usability testing and fed user feedback directly into development sprints.
- Kept visual and functional consistency across all digital touchpoints, backed by graphic design and branding work.

Education

M.Sc. Information Technology

Central University of Kashmir

B.Tech in Computer Science

Central University of Kashmir
